ONE CENT

CELEBRATION CROWDS ARRIVE EARLY TODAY

**Sullen Skies Fail to
Serve as Deterrent to
Visitors**

CARRYING OUT PROGRAM

**Events of Day Being Pulled
Off as Nearly as Possible
as Outlined**

Sullen skies and threatening weather at an early hour failed to serve as a deterrent to crowds anticipating enjoyment in Charleroi today, and people began early to arrive from out-of-town places. This morning, Charleroi was a mass of color as the result of the activity during the last two days and night of a corps of decorators. The program as mapped out a few days ago is being carried out as punctiliously as possible.

The real object of the demonstration today is to properly celebrate the opening of the new Charleroi-Bentleyville electric railway line. This is the reason why Bentleyville, Cokeburg and Ellsworth are assisting so heartily.

The beginning of the celebration was signalized this morning shortly before 10 o'clock by the arrival of Pigeon Creek valley people. They were met by a reception committee and escorted to the reviewing stand on McKean avenue where an address of welcome was delivered by Councilman W. R. Gaut.

Contests are being decided as rapidly as possible. One of the most interesting events of the day is that of the motorcycle hill climbing contest up Fifth street. This evening the illuminated industrial parade will be one of the leading features of the entire day.

ED. WELTNER'S STORE ROBBED

AT UNIONTOWN

When Ed. G. Weltner, formerly of Charleroi, opened his drug store at Uniontown shortly before eight o'clock Tuesday morning he noticed that the door at the rear entrance was open. Upon investigating Mr. Weltner learned that his store had been entered by a thief or thieves. All the change left in three cash registers, totaling about \$15 was stolen.

The open rear door, several cigar bands, and an empty whisky bottle were the only clues. Upon investigating, it was learned that an entrance was probably effected through a ventilator under the display window in the front of the store. At ten o'clock in the morning neither the county detective nor police had been notified.

HER LATEST AND GREATEST TRIUMPH

Mary Pickford in "Such a Little Queen" 5 reels. Friday at Coyle Theatre. The management suggests all who can see this picture in the afternoon to do so.

Charleroi Healthful

**Reports Show That Commun-
icable Diseases in Com-
munity Are Few**

The general health of Charleroi remains good despite the fact that the water is low and that the health in some of the nearby towns is not good. There is only one case of typhoid fever and it is a mild case. There is one case of scarlet fever. They will be out of quarantine Saturday a week.

Only one case of diphtheria has been reported. The quarantine will be lifted Saturday. Two or three cases of mumps are reported.

SCHOOL GIVES WAY TO AUTOS

**Fallowfield Directors Decide
to Move Building For
Safety-First**

HIGHWAY IS SPEEDWAY

School cannot hope to successfully compete with automobile joy riders if it would seem from the decision of the school board of Fallowfield township Wednesday evening to move the Rodgers School No. 8 from its present location to a point not in close proximity to any automobile race course or speedway.

This week parents of children attending the school petitioned the board to move the school, calling attention to the fact that it is located near the Maple Creek road, much used by autoists as a speedway. On Monday just five pupils were in attendance at the school. It is asserted that children had only one place to play during the recess hours, this place being in the road. Consequently their lives were endangered, by speed maniacs. The school board, of which Henry Rider is the president, took the action to move the school building as a safety-first movement.

CORNMEAL SUSPECTED NOW BY STATE COMMISSIONER

Dairy and Food Commissioner James Foust has started an investigation into the quality of the cornmeal being sold in the State now that the season of corn cakes and sausage is coming around, his attention having been attracted to some adulteration turned up by a chemist in a sample bought in Philadelphia. Similar mixing of the flour with materials that did not belong to it has been reported from other counties. It has been years since cornmeal has been under suspicion. It is largely a native product and made by small millers, but there are some brands which have fallen from their hitherto high estate.

SCHOOL DEPARTMENTS SHOW MUCH PROGRESS

**Domestic Science With Manual Training and
Allied Subjects Being Taught to Large
Classes at High School Building**

The domestic science department under the management of Miss Mildred Eddy and the manual training, mechanical drawing and woodworking department under the management of Prof. Charles M. Helwig, are busy departments in the Charleroi schools. There are 190 girls studying cooking and sewing. This includes the girls from the seventh and eighth grades and from the first year high school. There are 152 boys in the manual training department. This includes the boys from the same grades. Each pupil in these three departments are given instruction twice a week in their respective courses. The

SUPT. SCHAEFFER PRESENTS IDEAS ON RURAL SCHOOL

The annual report of Dr. Nathan C. Schaeffer, state superintendent of public instruction made public at Harrisburg says that the most important problem before the next Legislature will be betterment of educational facilities in the rural districts. He declared they needed more money for buildings and teachers and pupils better facilities for reaching schools.

Dr. Schaeffer said there had been a notable advancement in interest in industrial and vocational education, many of the cities having instituted extensive courses.

The superintendent voiced objection to numerous holidays and to the bringing to the schools of many problems which he considers as not within the duty of the educator to undertake.

Dr. Schaeffer said there should be an improvement in the teaching of English and in regard to the reading of the Bible in the schools it is now general, the statute having been accepted by teachers as law abiding citizens. He says history in so far as it prepares youth for citizenship is declared to be very valuable.

FALLOWFIELD GRANGE PROGRAM ARRANGED

The Fallowfield Grange No. 1382 will hold its next meeting at the home of A. B. Lutes Saturday evening, October 17. The literary program for the evening will be: Recitation, Hazel Lutes. Instrumental solo, Loyal Lutes. Reading, Helen Sphar. Recitation, Hazel Harford.

Made Long Auto Drive

R. E. McIlvried, master mechanic at the Pittsburgh Steel company at Monessen returned Sunday from a 1250 mile automobile trip begun a week ago this week morning. He went to Cleveland, there got his mother, drove on to Detroit, crossed into Canada at Windsor and went around Lake Erie through Canada to Niagara Falls, thence Buffalo and back to Cleveland. He reported little trouble not one blowout and a pleasant trip.

WAYNESBURG TEAM HARD AT WORK FOR SATURDAY WORK

The Waynesburg College football team, which includes several players from the Monongahela valley is being worked hard this week by Coach Neill, in anticipation of the game the coming Saturday with Thiel college.

The game Saturday will be the first of the year on the Waynesburg grounds. Jacobs, of Charleroi, is showing good form in the backfield and will probably be placed there the next game. Coach Neill had Carroll practicing drop kicking.

AUTO LICENSE DISTRI- BUTION TO BEGIN SOON

Automobile owners and divers and motorcycleists are urged to send in their applications for licenses for 1915 at an early date, according to a statement issued by the state highway department.

Applications will be received by the automobile division, from this time forward and beginning December 1 license plates for 1915 will be shipped out to applicants. These licenses will not be valid until January 1, 1915. It is hoped that by urging applicants to send in their requests early the congestion which has occurred in previous years will be avoided.

Since there can be no possible excuse for failure to apply for new license plates it is expected, in view of this notice, that the leniency shown last year to those who were tardy in applying for licenses will be withheld next year.

BASEBALL PRICES ADVANCE; BLAME PLACED ON THE WAR

The effects of war are felt in the least expected places. All baseballs that cost more than twenty-five cents are covered with Russian horsehide. The climate and the exposure to which the horse of the Russian steppes is subjected give his hide a peculiar toughness that makes it able to withstand the terrific strain to which a baseball is subjected. Unless Russia can keep her ports open for the exportation of leather, our national game will suffer inconvenience.

FILTERING WATER IS HARD JOB THESE DAYS

Pot Boils Over; Alarm

**Unusual Reason Given For
Report of Fire at Early
Morning Hour**

A pot of chocolate syrup on a stove in the basement of Frank John's drug store, boiled over this morning about 1:30 o'clock and caused a fire alarm to be sent in. The fire company quickly responded, but found that all that was necessary was to turn out the fire and get the smoke out of the building. No damage was done.

Mr. John went to the basement Wednesday evening before going home to turn out the fire. His cat attracted his attention to the rear of the building and he forgot the fire.

WATER LOW IN THE RIVER

**Record of 1908 Approached
in Monongahela--Stage
Far Below Average**

RAINS INCONSEQUENTIAL

The Monongahela river is lower than it has been for six years. The stage now is 7 feet 2 inches. In 1908 the lowest stage was 6 feet 9 inches. The lowest stage recorded at Lock No. 4 was in 1900 when the river fell to a stage of 3 feet 4 inches.

The lowest stage this season was 7 feet 1 inch, which occurred a few days ago when the drums were reset at Lock No. 3 and the water was let out of the third pool. Rivermen believe that the pool here will again reach the 9 foot stage.

Tuesday's rainfall as recorded at Lock No. 4 was .34 inches. This helped the river some, but not to amount to much. The rain fall for the past three months has been exceptionally light. It will take several inches of rain to make any perceptible change in the river.

The coal shipments through Lock No. 4 so far this month have been about on an average with the shipments for the same period of time in September. Considerable coal is being shipped to the down river points. A raise in the river would much improve the coal shipping facilities, it is declared, by river men.

Card of Thanks.

We wish to thank the neighbors and friends for the kindness shown during the sickness and death of our dear wife and mother and all those who sent flowers.

John Garey and family.
87-11

Wet Weather Prevents Race

Wet weather prevented the automobile race at the Pulaski track at Pulaski between A. D. Spencer in his Buick "Wildcat" and a Sebring Six car. The race is to take place today.

Heavy Expenditure Incurred by Purifying Polluted Monongahela

CHEAT RIVER BLAMED

**Water From Small Stream
the Real Thing for "Badness"
--Acid Hard on Boilers**

Unless there are rains in the Monongahela basin shortly, the Charleroi Water company will be truly "up against it" at its local filtration plant. And if the river gets as much polluted as it was a few weeks ago and remains that way the Charleroi Water company would probably be very willing to sell whatever water it enjoys here. Filtration at present is an expensive thing, but it is cheap compared to what it was for two weeks while the Cheat river pollution was slowly moving down the Monongahela.

The stage in the Monongahela is away below normal at the present time, and it will require several rains to bring it to an ordinary stage. Through opening the wickets at some of the locks the river was partly washed out a few days ago, and rains helped some to free the murky Monongahela from its pollution.

According to a statement of W. M. Darby, superintendent for the Charleroi Water company, filtration has been made exceedingly difficult while the Cheat river pollution was in the Monongahela. It cost on an average of from \$40 to \$45 per day to filter the water for local use. Now the cost is somewhat less, owing to the better grade of water.

C. C. Humphrey is the chemist at the Charleroi filtration plant. He has supervision of the work of getting the water increased from about a low percentage in quality to the high percentage of 98 or 99 pure.

Not only is cleansing the water an expensive operation, but the effect of acid on boilers is a source of expense that comes as a hardship on companies using water direct from the river. Steamboats plying the river have especially felt the detrimental effect of the acid.

CHARLEROI HIGH FOOTBALLISTS TO PLAY MONESSEN

The Charleroi high school football team and the Monessen high school team will meet on the grids at Monessen Friday afternoon at 2 o'clock. Both teams are in good condition and have been practicing with confidence of victory.

The lineup of the Charleroi team will probably be as follows: Pritchard, right end; Richey or Hepler, right tackle; Lutes, right guard; Brown, center; Ryland, left guard; Delaney, left tackle; Hickey, Stahman or Hickey, left end; Booth or Stahman, quarter back; Harry Carson, left half; Charles Lowmaster, right half; and Speers, full back.

J. K. Tener, Pres. S. A. Walton, Vice Pres. R. H. Rush, Cashier.

MAIL PUBLISHING CO
(Incorporated)
Mail Building, Fifth Street
CHARLEROI, PA.

E. E. Price, V. Pres. & Bus. Manager.
W. Sharpnack, Sec'y and Treas.
Lloyd Chalfant, City Editor
Entered in the Post Office at Charleroi, Pa., as second class matter.

ANONYMITY

Within the last two days the Mail received a communication from a Charleroi citizen offering criticism of the system which makes it possible for autoists to use the Maple Creek road as a speedway, to the detriment of school children. The communication—which by the way was strictly in accord with the belief of the author of the communication was known.

A week previous a communication was received, condemning certain alleged actions of a certain woman whose name was not given. It was in a sense slanderous. It was given no attention whatever, simply for the reason that the author of the epistle declined to make himself known.

No newspaper can afford to print anonymous contributions. Most newspapers are anxious to obtain contributions from their readers and will most willingly and gladly print them as long as safe subjects are treated in a sane manner, providing the writer is known. But the waste basket will be enlarged if necessary to contain the unsigned communications.

The publishers of a newspaper, whose names are at the top of the editorial columns are responsible for everything that goes into the paper. If something is published that is defamatory or libelous, they are to blame. Every editorial utterance, and every news article of every character appears with the name of the editor just as much as though the name were signed with every item.

There is every respect and admiration for the man who has thoughts and is not afraid to express them, but for the man who resorts to the of revenge or for any other motive there is nothing but contempt.

CONSTITUTIONAL AMENDMENTS

Voters in Charleroi and in every city and hamlet in Pennsylvania will on November 3 vote on five proposed constitutional amendments for Pennsylvania. All are important. It is the duty of every citizen to familiarize himself with the articles so that he can cast an intelligent ballot. The Mail has been printing the amendments, as proposed.

Amendment No. 1 changes section 1 of article 8 so as to permit women to vote under the same conditions as men now vote, the age being 21 years and a county tax receipt being required.

Amendment No. 2 changes section 2 of article 9 so as to permit the city of Philadelphia to increase its debt, and amendment No. 6 carries the same authority.

Amendment No. 3 permits the general assembly to pass acts requiring the payment by employer or employees, jointly, of reasonable compensation for injuries to employees arising in the course of employment, and for occupational diseases, whether or not such injuries or diseases result in death, and regardless of who is at fault.

Amendment No. 4 abolishes the office of secretary of internal affairs, the powers and duties to be transferred to other departments existing or to be hereinafter created.

Amendment No. 5 permits laws providing for a system of registering transferring, insuring and guaranteeing land titles by the state.

These amendments are important, and we reiterate that it is the duty of every voter to become familiar with them and vote as his judgment dictates.

PICKED UP IN PASSING

Recently two Charleroi girls were in Bentleyville to represent a local firm which had some soliciting to be done. One was asked in a Bentleyville business house upon their entrance what they were demonstrating.

"We are selling soap," responded the vivacious maiden.

"Selling soap?" he queried. "Giving demonstrations?"

"Yes, we give demonstrations."

"Well what do you do?"

"We—Oh, I make the suds."

Beaten in the skirmish the man returned to his work.

At a local hotel Monday evening, N. G. Steltz, a traveling salesman for the American Type Founders company, who is one of the most popular men on the road today, engaged in an argument with a baseball fanatic, who was possessed with belief that he was an expert. Steltz got him to tell just what was wrong with the Athletics in their world's series games, then objected. The argument waxed warm.

"What do you know about baseball anyhow?" demanded Steltz.

"Me, well—"and the man went into a detailed explanation showing his own knowledge of the intricacies of the national pastime.

"Why, man you don't know the first principles of baseball," observed Steltz.

The man gurgled. That was almost too much for him to stand. But he protested hotly he did.

"Allright," said Steltz. "You know so much about baseball tell me this: How many stitches are in a baseball?"

The man could not answer but gurgled some more, while Steltz laughed. Then the self-styled expert made a quick getaway.

ELECTRIC SPARKS

Portugal may enter the war. Then the war will enter Portugal.

Think of the possibilities in a household conducted according to the European plan.

Perhaps there is not a baseball player who really does write the stuff under his name, but if any one could it would be Mathewson you bet.

A girl in the slickest kind of slit skirt wouldn't attract half the attention she would out of it. So there you are.—Judge.

Answers to Correspondents.

Annie—What can I do for itching feet. Make a hasty getaway.

George—What is the best way to reason with a woman. As you value your life, don't try it. Jolly her.

Censors are holding the news of the war, but let them hold the news of the world's series, and see what happens.

W. & J. chased Harvard to a 10-9 score, and it was announced after the game that Harvard's star was suffering from appendicitis. The whole team was suffering from worse than that.

A La Baseball.

Its easy enough to be happy

When things go along with a song.

But the man worth while

Is the man who can smile

When the series goes dead wrong.

TAYLOR TRIAL

SET TO BEGIN

NEXT MONDAY

Jacob Taylor, son of Mr. and Mrs. John Taylor, of Mount Braddock who is being held at the Pittsburgh jail, as the alleged murdered of little Florence Dove, of Braddock, in May, will be given a hearing in Pittsburgh, on Monday, October 19.

In an interview, Mr. and Mrs. Taylor stated that their son was innocent of the charges and that he would enter a plea of insanity as they thought it could be proven that he was innocent of the crime. Mrs. Taylor stated that eight men had been held in the same manner as her son and had been treated in a similar manner. She also stated that the identity of the girl was not complete. Mr. Taylor thinks the case is the work of detectives in trying to locate the murderer. Both Mr. and Mrs. Taylor were very confident that their son Jake would be acquitted at the trial.

SIMPLE ENGLISH NOT NEEDED

Cub Reporter Got Something of a Jolt in His Interview With Educated Chinaman.

Two San Francisco reporters were assigned to call on Chinamen and interview them on an immigration measure pending in congress. One of the reporters was a cub and an Easterner, while the other, an experienced man, assumed the management of the assignment.

"Cares" he said, after they had invaded several Chinese shops without any important result, "youder is a tea-store. Beat it over by there and talk to the boss about Chinese voting. I'll go in next door. Remember to use the very simplest English you can."

The cub went inside the tea-shop and thus addressed the proprietor:

"John, how? Me—me—Telegraph, John? Newspaper—savvy, John? We want know what John think about Chinaman—vote—all same Melican man. What John think—Chinaman—vote, see? Savvy, John? Vote? What think?"

The Chinaman listened to all this with profound gravity and then replied:

"The question of granting the right of suffrage to Chinese citizens who have come to the United States with the avowed intention of making this country their permanent home is one that has occupied the attention of thoughtful men of all parties for years, and it may in time become of paramount importance. At present, however, it seems to me that there is no exigency, requiring an expression of opinion from me upon this subject. You will please excuse me."

The cub went outside and leaned against a lamp-post to rest and recover from a sudden faintness. His fellow reporter had purposely steered him against one of the best educated Chinamen in the United States.

WIND USED TO MAKE MUSIC

Investigation Has Disclosed Just How the Pressure Required May Be Ascertained.

In an interesting article in the Philosophical Magazine, Mr. Foord refers to Doctor Stone's table of wind pressure required to play various notes of the scale on various instruments. The table indicates that as the notes rise higher in the scale the air pressure necessary to produce them increases with most wind-instruments, although not with all. In the clarinet, for example the pressure decreases from the low notes to the high ones, varying from 15 inches of water to 8 inches.

Mr. Foord repeated these experiments on the clarinet and saxophone playing the whole range of notes first loudly and then softly. For the clarinet it is found that the pressures fall as the notes rise, agreeing with Doctor Stone's table, although the inverse law holds good for the oboe, bassoon, horn, cornet, trumpet, euphonium and bombardone.

With the saxophone it is found that the pressures corresponding to notes at the beginning and end of the register are equal, the pressure rising to a maximum at the note D about halfway through the scale.

Composing Letters.

It is related of a merchant that, impatient at the long delay of a customer in settling his accounts with him, he said at last to his young clerk, "Write to that man and tell him that I can wait no longer." "What shall I write to him?" the young man asked. The merchant was hurried and answered crossly and without thought, "Something or nothing, and that soon!" In a few days a check came from the delinquent, paying the entire amount of his indebtedness. Surprised, the merchant asked his clerk, "What did you write to that man?" "Just what you told me to," the young man answered. "I did not tell you what to write." "Yes, you did; you said 'Something or nothing, and that soon.' I wrote that."

True, O Uncle Joshua, it takes some one more wise than a fool to "compose a letter."—Atlantic.

Conquering One's Work.

The best way to get out of work you do not like is to make a tremendous success of it. The people who throw up the work they do not enjoy are frequently forced by necessity to take something they like even less. But one who does uncongenial work in such a fashion as to make a success of it may in time be placed where he can choose his work and dictate his own salary. Do not try to get out of disagreeable work by doing it so poorly that your employer will conclude that it is not worth doing at all. Instead, do it so well you will force him to realize that he needs you for a higher place.

Even to the Least.

Victor Hugo says of that bishop whom all readers of "Les Miserables" will never forget, "He sprained his ankle once trying to avoid stepping on an ant." He belonged to the order of those who would not "needlessly set foot upon a worm." This attitude toward life, even when we meet it in its lowliest forms, can be cultivated in children if parents start early enough. If there are harmful creatures whose meaning we cannot understand and which must be destroyed, let the destruction be without necessary suffering and never in the spirit of cruelty.

419 McKean Ave., Charleroi

THORN IN ENGINEERS' SIDE ADMINISTRATOR'S SALE OF IM-

"Cucaracha Slide" Has From the First Been the Bane of Builders of the Panama Canal.

It was the "Cucaracha slide" in the Colobra cut at Panama that killed Lieut. Col. Gallard with overwork and overworry—and now, in the final blast with 4,800 pounds of dynamite it has killed, with the premature discharge, five men. In addition, 17 men were injured, of whom several may die.

The same "Cucaracha" means "cockroach," and the crawling activity of this monstrous foe has given the American engineers and their French predecessors more trouble than any other part of the canal excavation. From first to last it has offered a continuous discouragement of resistance to the steam shovel, bringing tons of clay with a glacier-like movement down into the canal "prism" by night after the work of the broiling day had removed it. It is as though in revenge for its defeat it turned upon the workmen in its last throes, to add to the honor roll of those who have laid down their lives that the passage from sea to sea may be accomplished.

Big Snake Too Friendly.

Awakening to find something coiled about her arm, Miss Hazel Joseph, who lives at Jim Run, in the mountains near Cedarville, Pa., threw it off and ran into another room, returning with a lamp. The light showed a big snake stretched across the back of her younger sister, Loretta, who occupied the same bed.

Hazel's screams awakened Loretta, who shook the reptile to the floor. Their father, hearing the noise, came and killed the snake. It was a black racer more than six feet long.

Obliged to Move.

"Where are you going?" asked one fisherman.

"I'm going to leave these mountains and go to the southern coast," replied the other as he threw some clothes into a suit case.

"What for?"

"Somehow my imagination won't work when it comes to bass or trout. I can't think of anything but shark stories."

Easily Remedied.

Doctor—Well, Mr. Jones, how are you feeling this morning?

Mr. Jones—Very much better, thank you, doctor. The only thing that troubles me is my breathing.

Doctor—Um—yes, we must see if we can't get something to stop that—Stray Stories.

PROVED REAL ESTATE.

By virtue of an order of the Orphans Court of Washington County, Pennsylvania, the undersigned Administrator of Tereolo Caraffi, alias Thomas Caraffi, late of Dunlevy, Allen Township, Washington County, Pennsylvania, deceased, will offer at public sale on the premises in the aforesaid Village of Dunlevy, Allen Township, Washington County, Pennsylvania, at 3:00 o'clock, P. M., Saturday, October 31st, 1914, Lot No. 8 of the Plan of Lots of Dunlevy bounded and described as follows:

BEGINNING at a post at the side of the Township Road; thence along the side of said road, South 54 degrees, 46 minutes East 40 feet; thence by Lot No. 9, North 35 degrees, 14 minutes East, 110 feet; thence North 54 degrees, 46 minutes West, 40 feet; thence by Lot No. 7, South 35 degrees, 14 minutes West, 110 feet to the place of beginning. Having erected thereon a two story frame dwelling and other improvements, and

BEING the same lot of ground conveyed to the said decedent by deed of John Blyth, et ux., dated September 7th 1896, and recorded in Washington County, Pennsylvania, Deed Book 351, page 394. Terms of sale 10 per cent in cash and balance upon confirmation by said Orphans Court.

Frank Riva, Administrator.

Charleroi, Pa.

David M. McCloskey, Attorney.

Was Noted Catholic Prelate.

James Roosevelt Bayley, the predecessor of Cardinal Gibbons as archbishop of Baltimore, was born 100 years ago in Rye, N. Y. He originally intended to make medicine his vocation but abandoned the study at the end of one year, and in 1840 was ordained a priest of the Protestant Episcopal church. Assailed by religious doubts, he visited Rome in 1841 and was received into the Roman Catholic church. Several years after his return to America he became president of St. John's college, Fordham, N. Y. In 1853 he became first bishop of Newark, N. J. Here he founded Seton Hall college and transferred to the archiepiscopal see of Baltimore, the highest honor the church had to offer in the United States.

WAR BULLETINS

Austrian advance in Galicia has forced the Russians to lesson their efforts against Przemyśl, according to a dispatch to the Austro-Hungarian embassy. Kuzwadow on the San has been retaken from the Russians.

Petrograd, Oct. 15.—On the left bank of the Vistula, the Russian troops successfully pushed back the German forces. Two German companies were captured by Russian troops. Fighting still continues to the south of Przemyśl.

London, Oct. 15.—British troops have been engaged with the enemy toward the left of the allies line in France with the result that the Germans have been pressed back slightly on their flank.

Paris, Oct. 15.—In the Belgian field of operation there were encounters in the region around Ghent. English and French troops have occupied Ypres.

London, Oct. 15.—A statement from Berlin says that the Germans have been able to drive the most of the Russians from around Przemyśl. Several military bridges near Soumka broke down during the retreat. Many Russians were drowned in the river San. Fighting east of Chrow, Galicia continues. The German cavalry drove back a Cossack division in the direction of Drohobycz. The weather conditions have been unfavorable.

Manchester, Mass., Oct. 15.—The

OVERSPEEDING OF TRAIN THE CAUSE OF DEATH

An inquest was held over the death of Mrs. Margaret Craft, who was struck by a Baltimore & Ohio passenger train at the crossing on Fayette street at Uniontown, October 2, Tuesday afternoon before Coroner J. Harry Bell.

The jury was composed of John Christy O. M. Boughner, G. O. Rush, H. L. Burchinal, C. M. Fee and R. S. McCrumb of Uniontown and rendered the following verdict:

"The jury finds, That Mrs. Margaret Craft, aged 70 years of Uniontown, came to her death on the second day of October, 1914 at Uniontown, Fayette county from being hit by a B. & O. passenger train at the Fayette street crossing in the borough of Uniontown, Pa., at the time aforesaid, while she was riding in an automobile. We further find that said passenger train was in care of Conductor Keefer and Engineer Steppe at the time of the accident, was running at rate of 25 or 30 miles an hour, exceeding the speed limit which by the borough ordinance is four miles."

CHARITIES WORK IMPORTANT IN THE VICINITY

During the last few days the board of associated charities have received a lot of clothing from several families in the town. Preparations are now being made to have a room in which to take care of clothing and other things that are donated for the use of the associated charities in their work among the poor this winter.

A member of the board in speaking of the matter today said, "I wish the people would ascertain what clothing they can spare for the use of the associated charities." He declared that the board is much in need of clothing and especially shoes.

Money will be raised this year as it was last year by subscription. Last year the board had good success in raising money in this manner. The board has paid out over \$400 for the relief of the needy since the first of the year.

DRUM CORPS HERE WITH ANCIENT DRUM

Crafts band from Redstone township in Fayette county, arrived in Charleroi early this morning. This band was organized in 1847. William Craft, aged 69 years, who is the only living member of the old band is playing with the band today. Joe Palmer, aged 65 years, is beating an old bass drum that was made in 1810. There are 10 members of the band here today.

PERSONALS

Mrs. Elizabeth Clerihue has returned home after visiting with her daughter Mrs. C. E. Bunting of Wilkensburg.

Mrs. Clyde Jenkins of Washington avenue visited relatives at Monongahela Wednesday.

Mrs. James Stuart of Speers and several friends of Bentleyville attended a banquet at Schenely hotel, Pittsburgh.

TO DISCONTINUE PULLMAN SERVICE IN MONON VALLEY

The retrenchment policy of the Pennsylvania Railroad company will be further felt in the Monongahela valley on October 18, when the only Pullman car the Pennsy ever boasted on the Monongahela division, will be removed from service. Notice of the change has been posted, and like other previous schemes of retrenchment is supposed to be a move to emphasize the reported necessity of an advance in freight and passenger rates. The Pullman car has been going north with train No. 147, to Pittsburgh, due in Charleroi at 9:06. The return trip has been in the evening with train No. 168, due in Charleroi at 6:28.

Ordinary patronage has been realized ever since the Pullman service on the division was inaugurated several years ago.

PROGRAM IS OUTLINED FOR BAND CONCERT

Following is the program for the band concert to be given by the Ellsworth-Cokeburg band during today: Part 1.

"America"
Willow Grove March... E. Torentino
La Paloma Spanish Serenade... Yradier
Salute e Lunga Vita Waltze...
G. Rabazzi
Clarinet Solo, Amittie Polka... Gary
Mr. Fred Kusman
Flower de Brazil—Tango Argentine
tino... A. Castro
Cornet Solo, Zaraida Polka...
F. H. Losey
Mr. Thomas Calaham
March Coronation... G. Meyerbeer
Part 2
Blue and Grey Patrol... Dalby
March, What a Fool I Be... H. Tilzer
Overture, Poet and Peasant... F. Suppe
Adele Valse from the French operetta... A. Lampe
Cornet Solo, Grand Fantasia...
Tramp, Tramp, Tramp R. Wagner
Mr. Frank Angotti
Tannhauser March... R. Wagner
The Flower of Italy (Ti Fiore...
d'Italia)... G. DeStefano
"Star Spangled Banner"

NEW RECORD ESTABLISHED FOR PIECES IN QUILT

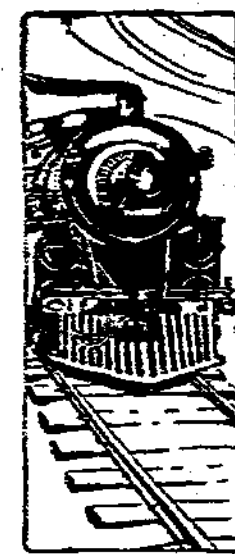

Recently a news item was published in reference to a Butler county resident piecing a quilt containing 1,640 pieces and claiming to hold the record for the making of a quilt with the largest number of pieces. Miss Jane Sleeth of Burgettstown, R. D. 4, can go one better than Miss Georgia Jackson, of Butler county, as she has a quilt which contains 3,712 pieces. Miss Jackson thought she had set a new world's record as the greatest number of pieces in any quilt on record was 4,200. This quilt was owned by Mrs. N. Newman of Greenwich, England. Miss Sleeth's quilt contains 1,512 more pieces than Miss Jackson's and Mrs. Newman's and 4,672 more than Miss Jackson's. A New Castle woman has come forward with a quilt however that has more than 12,000 pieces.

Opposite Aims.
"There is one occupation which is very hard work."
"What is that?"
"Finding easy marks."

Accounted For.
"Jobbins denies he is a grafter, but he certainly has an itching palm."
"That may be because he's always had to scratch for a living."

Two
ways
of
getting
along

Which wins?

Now and then, we hear people say that they can get along without a typewriter. Yes, we believe that. Only forty years ago everybody got along without one.

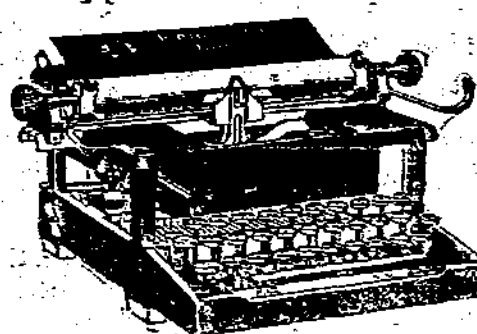

So they did, a little further back, without the steam engine and the railroad train. They got along without them because there were none.

Anyone today who thinks he can get along without the typewriter because he can do his writing with the pen, is like the man who thinks he doesn't need the railroad because he can walk. In your method of writing you may be "walking" today. If so, then remember that the railroad is built and—

*YOUR Train has arrived
It is the New*

Remington JUNIOR Typewriter

We have built the Remington Junior on purpose for those who have writing to do and need a typewriter but who haven't bought one—yet.

We have built it for the traveler and for the home; for the doctor, the clergyman, the farmer, the retail storekeeper—for everyone who needs a typewriter for the simpler uses, like manuscript and letter writing.

The price of the Remington Junior is fifty dollars, cash with order. It is just what its name implies, a "boiled down" Remington; smaller, lighter, simpler and more portable, but a true Remington in the work it does and the way it does it, and sold under the iron-clad Remington guarantee.

Here is your chance, absolutely your first chance, to buy an absolutely first-grade typewriter at a medium price. For \$55.00, we will sell you a Remington Junior on terms of \$5.00 down and \$5.00 a month. Cut out the attached coupon and send it to us with \$5.00 in cash, check or money order, and we will send the machine.

Household Hints

The hardest part of housework is cleaning!

Ordinary soap and soap powders seemed good enough until the cleansing power of borax was discovered.

Borax is to soap what electric light is to the street car—borax makes soap do more work at less expense.

A 25c package of 20 Mole Team Borax Soap Chips will do more cleaning than 50c worth of bar soap and as much or more than 50c worth of soap powder.

BEALLSVILLE

Frank Miller was a visitor the last week at Washington.

Avery H. Sargent, Robert Harford, are home from Fayette county.

Mrs. Kennedy of Waynesburg is visiting her brother, Dr. Milton P. Manning.

Mrs. John W. King spent the past week with relatives and friends at Munhall, her former home.

Miss Alta Grable, near town, who has been very ill, remains in a critical condition.

Miss Lulu E. Trew of Charleroi, has returned to her home after a short visit to her sister, Mrs. Halbert Ernest Dawson at the H. H. Dawson home.

Mrs. Margaret S. Barnes, son Joseph, Miss Helen May Hill, Fred Hill are back from a stay at Charleroi. Mrs. Elizabeth Hill, Mrs. D. L. Eisinger, Mrs. Samuel Dray of town, were guests of Mr. and Mrs. James F. Hill of Charleroi, the last week.

The Beallsville foot ball team will play at Ellsworth. On October 24 the Washington B. A. C. team will play at Beallsville, and on November 7, the Brownsville team will play the Beallsville eleven on the Beallsville grounds.

The Deemston Grange initiated a class of candidates Friday evening. Following the meeting a lunch was served by the ladies of the grange. The Grange is one of the largest in the county, with a membership near the hundred mark. Archie K. Wickham is master.

Miss Mabel Horton, of Centerville, teacher of the intermediate room of the Beallsville schools, chaperoned the school on a trip to the bridge opening at Brownsville, Thursday. Quite a number of others also attended the event.

Mrs. Ernest Hawkins, of near Beallsville, who sustained severe bruises and other injuries in an automobile accident, near Brownsville, Thursday, while enroute to attend the bridge opening is getting along as well as can be expected. Mrs. J. L. Brown of Bentleyville, who was also injured is getting along nicely.

Miss Edith Sullivan of Philadelphia, who was called here by the death of her father, the late William Sullivan after a stay with her grandmother, better appearance. Not only in the home of W. B. Flick, of "The Pines," has gone to Pittsburgh to visit friends. Josephine C. Barnard, one of the

Excitement in Manchester.

She was standing on Hanover street talking to a middle-aged man. Every one was taking a side glance as they walked by and more than one turned around and came back to stare for a second time. And all because the young woman in question was wearing one of those new-fangled split skirts with trouserettes. It was very evident that she was not a native, but that Boston had seen her on more than one occasion.

She was not at all bashful and when one over-curious individual stopped in his tracks to see the shapely trousered limb, she simply smiled and talked faster to her companion. The ladies were even more curious than the men. They all stopped on the other side of the street and watched for some time before they continued down to do some necessary shopping. The sight was an unusual one for Manchester and was sure a magnet to attract the crowds. Manchester Mirror and American.

Fine Archeological Specimens. Archeological discoveries of great importance have been made in the excavations at Alise-Sainte-Reine—the ancient stronghold of the Gauls which was defended against Caesar by Verucetorix.

At the spot known as Saint Pere cemetery, near the sixth-century Christian basilica discovered last year, M. Pernet, who is directing the searches, has exhumed the skeleton of a warrior, having at his right side a splendid iron sword and at his left side a dagger of similar metal, with the worm-eaten remains of a wooden sheath.

At a short distance away three ancient hunting knives were found, together with a bronze ornament—a marvelous piece of work, representing the head of an animal. This latter is considered the finest specimen of its kind unearthed so far in the excavations, and has been placed in the Alisea museum at Sainte Reine.

Value of Cool Nights. Heat waves says Edwin C. Martin, author of "Our Own Weather," prove disastrous directly in proportion as hot nights are combined with hot days. "For a number of days successively the heat may mount during the day to extraordinary heights, but if the intervening nights turn comparatively cool the number of prostrations and deaths will be much less than under a considerably lower temperature continuing with scant abatement through the day and night. Thus any situation that peculiarly favors cooling off at night has a clear advantage during the prevalence of a hot wave. It is also an advantage to be insured to heat. The same degree of it that would cause great suffering to the people of the North imposes nothing more than discomfort on the people of the South.

oldest and best known residents of Beallsville, who has been ill, is recovering.

In compliance with Superintendent L. R. Crumrine's request the schools of the community observed Friday as "clean-up-day," and as a result the buildings are presenting a much better appearance. Not only in the town in the community but in the country districts as well as the day observed.

BENTLEYVILLE

People Go Visiting.

Today the majority of the town's citizens are witnessing the sights in Charleroi, where the main seat of the four town celebration attractions are found. It is thought that there will be many participants from Bentleyville in the marathon, bicycle and other races.

Secure Lot.

A turn yard belonging to W. F. Richardson has been secured for the erection of the tabernacle here on November 15. The yard is in a prominent place and well adapted for its coming mission.

Personals.

R. M. Plenderleith, of New York, previously of this section, is slowly convalescing from a serious attack of typhoid fever.

Carl Sargent of Beallsville, was attending to matters pertaining to business in town Wednesday.

A Hamburgher, a business man of Pittsburg, was attending to furniture sales in Bentleyville, Ellsworth and Cokeburg Wednesday.

Charles Wolfe of Pittsburg, is spending some time at the home of N. VanVoorhis of near here.

The Vanceville grange will hold a meeting Friday, October 16, and render an interesting program.

Solomon Malakoff is extensively repairing the business and tenement block recently purchased from J. E. Richardson on Main street.

Thomas Myers of Charleroi, was a caller in town Wednesday.

The Cokeburg postoffice will presently be remodeled, a more complete postal system will be inaugurated.

Toothache is Ancient.

It has been discovered that hundreds of years before Columbus discovered America the aborigines of this continent employed, not to say tolerated dentists. And only a while ago it was discovered that dentists flourished in ancient Egypt long before Moses was found in his basket of rushes beside the Nile. The ancient American dentists practiced the art of filling teeth. Some of their work has lasted to this day in skulls found in old burial mounds by Prof. M. H. Saville of Columbus university. These discoveries prove the antiquity of toothache—and reveal to us the fact that these men of hundreds and thousands of years ago probably approached the shop of the dentist with about the same feelings as possess the man of today. All of which is of no particular account to the man who knows he must soon approach that ordeal, is it?

The Permanent Things.

The Rhine is flowing today as when the ruined castles on its heights were still unbuilt; the waters of Geneva are as blue; the black shadows on the surface of Constance come and go as gently; the pine needle carpets of the forests of the Vosges are as soft; in the Campagna this evening the mellow light will creep over the land to the call of the Angelus as a week, a year, a century ago; the Alps stand immobile insensate even to the music of their moving glaciers. With them it is today as it was in the beginning.

These are the things says the New York Press editorially, that are permanent; the things that stand above and immune to the consequences of man's criminality, his idiosyncrasy, his pettiest antagonisms, his outbursts of empty, thoughtless rivalries and jealousies; his insatiable appetite for empire, his futile diplomacy and the wars he summons to his own ruin.

Anklets Like Phonograph Disks.

The women of southern Nigeria wear extraordinary brass anklets shaped like gramophone records, which are riveted on to their legs at an early age, and are never again taken off. Walking in them, as will be readily imagined, is very difficult, and necessitates keeping the legs far apart while running is altogether out of the question. The disks are kept highly polished, and when the women walk in long files to market the sight of their anklets flashing in the sun excites the envy of their poorer, but more comfortable sisters.—Wide World Magazine.

Latest Laundry Novelty.

A bench equipped with an electrically driven washer and wringer and having space to accommodate two rinsing tubs and a clothes basket, is a new invention. The motor is located under the bench and drives the washer and wringer shafts through belts. The wringer is supported on horizontal slides so that it can be moved from tub to tub. The outlet for draining the tubs is threaded so that an ordinary garden hose may be attached thereto and the water conducted to a drain. The platform for supporting the clothes basket can be slid out of the way when not in use. The portion of the bench on which the rinsing tubs rest may be raised when wringing so that the tubs and wringer are brought into a more convenient relation for this operation.—Electrical World.

SALMON'S NEED FOR OXYGEN

French Scientist Believes He Has Discovered Reason for Peculiarities of Valuable Fish.

At a meeting of the French Academy of Science recently an interesting communication was made on the result of the observations of Professor Roule on the migration of salmon to fresh water.

The observations covered the rivers entering the sea on the Breton coast, and it was found that the proportion of oxygen dissolved in fresh water was the principal factor determining the ascent of the salmon. Like all fish of their family, the salmon have an intense need of breathing, and this increases in the reproductive period. Consequently they only enter rivers whose waters are able to satisfy this need by the quantity of oxygen held in solution. It is in the search for this water that leads them up the rivers, even where obstructions make it necessary to leap in their characteristic way.

Besides the scientific interest, Professor Roule's observations, if they could be proved, would possess great practical value, as they would enable one immediately to discern which rivers were worth an attempt to introduce salmon by purifying the water, providing ladders, etc., and which were the rivers in which such labors would be certain to be vain.

MARKS RICHNESS OF BUTTER

Yellow Color Shown by Experiments to Be Affected by the Nature of the Feed.

The rich, yellow color demanded by the public in dairy products has been shown to be due primarily to the nature of cow feed. This announcement is made by the department of agriculture as the result of experiments carried on in co-operation with the Missouri state experiment station.

The conclusion is that, although to some extent a breed characteristic, the intensity of this yellow color, may, within certain limits, be increased or diminished at will by changing the cow's rations.

Chemical tests show that the yellow color in milk is produced by several well-known pigments found in green plants, the principal one being carotin, which constitutes a large part of the coloring matter of carrots. The other yellow pigments in milk are known as xanthophylls. These are found in a number of plants, including grass, but are especially abundant in yellow autumn leaves.

This explains the fact that fresh green grass and carrots increase the yellowness of butter. Green grass is probably richer in carotin than any other dairy feed and cows feeding on it produce the highest colored butter.

The Unity of Life.

There is nothing, I think, that brings home to one more conclusively the unity of life, and therefore the unity of knowledge of that life, than the attempt to study any particular subject by itself and confine yourself to it alone. You find very soon that you cannot do so. No aspect of life can be separated from the rest and understood even in any small degree without some knowledge of the rest of life. No part of life stands alone. Every phenomenon of life is the result, not of one or two causes alone, but of the interaction of innumerable causes. To get near the understanding of only one item you must be able to estimate more or less truly all the forces that make life and the objective of life. As with the eddy of a river, to estimate it you must know not merely the eddy but much also of the river, its volume and its speed, the density of its water, the configuration of its banks and its general direction. The observation of the eddy only would lead you into the wildest fallacies.—H. Fielding-Hall, in the Atlantic.

Suit Fro Files.

The courts have passed upon the question of damages for a sufferer from typhoid who could trace his illness to flies feeding upon the filth of sewage. A few years ago a man living in Germantown, Philadelphia recovered heavy damages from the city for his illness, which he proved was caused by a stream flowing through his yard which had been polluted by sewage from a house tenanted by a typhoid patient. The defense relied upon proof that the plaintiff had neither drunk from nor bathed in the stream, but an entomologist convinced the jury that he had contracted the disease through the medium of flies, which had carried the infection from the stream to the food exposed to their visits in his house.

Human Nature Little Changed.

Writings of the ancient Egyptians inscribed on papyrus, a primitive kind of paper, made from the inner bark of reeds, recently discovered and exhibited in London, reveal the people of Pharaoh's day as having tastes and characteristics which still mark human nature the world around. One of the documents relates to the death of a man who fell from a roof to which he had climbed in order to get a closer view of some dancing girls. Announcements of horse races and athletic sports were found, as well as the record of the complaint of a wife against her husband based on his refusal to give her the keys to their house.—Popular Mechanics.

ROAD MEN WILL MEET

Better Highway Boasters to Confer With Supervisors

The second semi-annual meeting of the road supervisors of Washington county will be held in the Town Hall, Washington, Tuesday, October 20. While this is announced as a supervisors meeting the committee desires it to be understood that every person in the county interested in the good road movement is expected to be on hands. A well known speaker on good roads work will be present to make an address besides short talks by roadmakers. The speaker of the day will be Donald McCaskey, of Lampeter, Lancaster county, who is the organizer of the famous township road patrol system in that county.

The purpose of this meeting will be to get the road supervisors better organized and make their work more effective. It will also be the purpose of this meeting to get the people interested in good roads and to get busy early in the spring and late in the fall and get the highways in good condition for travel.

The first session will be held at 10:30 o'clock and all talks will be confined to ten minutes each. Dr. W. L. Dodd will have charge of the meeting. Dr. Martin will open the session by a short talk on the success of the Good Roads Day. Alexander Gray, division engineer for the State Highway department will talk on "The State's Desire to Co-operate with the Townships in Road Improvement."

Rev. C. L. McKee will give a five minute talk on "Court the Ministers in for Good Road Work."

A representative of Washington and Jefferson college will tell what the college will do for better roads.

The general subject for discussion will be "Preparatory Work for Use of Road Drag." This subject will be divided as follows: Grading, R. S. Hixon; drainage, A. J. Smith; widening, Robert Bamford.

At the close of the morning session the good roads boomers will be taken to a theatre where moving pictures will be shown of "Good Roads Day last May."

County Commissioner R. L. Munce will be the first speaker of the afternoon session. He will talk on "Personal Observations, Pertaining to Good Roads Day."

A representative of the Rural Mail Carriers association will give a talk on suggestions for bettering the dirt roads. The speaker has not yet been selected.

Dr. McCaskey will be given considerable time following this address to explain how the road patrol system is worked in his county.

Dr. McCaskey is widely known in good roads work and his address is sure to be interesting as well as instructive. Following his talk a half hour will be given for general discussion. This will be followed by a short talk by E. S. Bayard of the National Stockman who was one of three judges in the contest in the Road Patrol System in Lancaster county. He will tell what he saw while acting in this capacity. The report of the committee on resolutions will be heard after this talk which will close the meeting.

PLEA OF GUILT TO SPEAKEASY CHARGE FILED

Charged with running a wide open speakeasy at Bentleyville, Bob Patten a foreigner, entered a plea of guilty Monday. On account of the case being an aggravated one he was given a little more severe sentence than is usual for first offenders. He was sentenced to pay the costs, fine of \$500 and to undergo imprisonment in the workhouse for four stated that Patten's place had caused much complaint that it was one of the worst places in the county. Information was made against Patten last April, but he disappeared and was not apprehended. In July complaint again reached the district attorney about Patten's place. After considerable effort he got the officer in that section busy and Patten was arrested. Considerable booze was secured. Patten said he got his beer from an agent for the Victor brewery at Jeannette and also from the agent of the Kittanning brewery.
